

Travel is part of the basic human needs, travel is an art. The tourism sector is one of the most promising sectors in this country for reducing unemployment and generating revenue.

But there is no single application with sophisticated and detailed information related to travel in our country. **BD Vromon** have is thinking about creating a sophisticated web and mobile application and provided a platform for the income of enterprising youth through the service of everyone in the field of travel. Passengers want hassle-free service at the right price. **BD Vromon** is working to bring accurate information and budgets for travel, accommodation, travel and other entertainment to people from all walks of life. Their main goal is to provide travelers with an effective travel gift that provides all the information and budget to return home safely from the start of the tour.

BD Vromon wanted to provide detailed information about our country's each and every single tourist spot, like transportation, local transportation, hotel and cottage information, restaurants and traditional foods and others related information. they wanted to provide a transport booking/hiring, hotel/cottage reservation, local guide booking system in their application so that traveling becomes easier for the travelers.

They want to offer transportation, hotel sit, restaurant, guide etc. to the potential customer at a reasonable price and also offer some packages, special tour events etc.

BD Vromon want to provide facility to the local hotels, motels, restaurants, young people who want to earn money by guiding the tourists a platform for boosting their income.

BD Vromon appointed you as their UI/UX expert to design their application. You have to consider interaction design aspects and considerations during the design process.
